SUMMARY

PICT undergraduate (CGPA: 9.58) with industry experience in enterprise software, backend development, and AI-driven workflows. Strong foundation in Python and C++, with hands-on experience in system integration, data validation, and application reliability. Experienced in software development, testing, and deployment within Agile teams.

EXPERIENCE

AI/ML Intern — Prorigo **Pune, India**
Mar 2026 – Present

- Worked on **Protrak**, an enterprise low-code/no-code platform used to build AI agents and automate business workflows.
- Contributed to the development of a modular **AI Agent Studio**, enabling configurable workflows through reusable nodes for agent execution, data retrieval, and enterprise operations.
- Improved the reliability of agent-driven operations through metadata-aware query validation, structured OData generation, and user-confirmation checks (Human in the loop) before modifying business records.
- Developed an Application Context Engine to connect user requests with application state, selected records, and entity relationships, enabling agents to perform context-aware business operations.
- Developed reusable MCP-based integrations to connect AI agents with enterprise services, strengthening backend reliability through API validation, error handling, and automated integration tests.
- **Regulatory RAG System:** Developed a document intelligence pipeline to retrieve relevant information from complex regulatory documents using contextual chunking, Qdrant, and citation-backed responses.

PROJECTS

Medico.ai — AI Medical Intelligence System | *Python, LangGraph, FastAPI, Next.js* GitHub

- Built an AI-assisted clinical assessment system that manages multi-step patient interactions, maintains context across follow-ups, and generates structured medical reports.
- Improved workflow reliability through urgency classification, persistent assessment records, and PyTest coverage for authentication, triage behavior, and AI failure scenarios.

ResearchSync — Research Publication Management System | *FastAPI, PostgreSQL, React* GitHub

- Developed a centralized research publication platform for PICT to replace manual data collection and verification, streamlining faculty submissions and accreditation reporting.
- Developed a PDF-to-structured-data pipeline to reduce manual publication entry, incorporating metadata validation and coordinator review to identify incomplete or inconsistent records before institutional reporting.

Elevra.ai — Student Success Intelligence Platform | *AI/ML, Data Analytics, Full-Stack* Live Demo

- Built a student success platform to address fragmented campus data by unifying seven academic, attendance, learning, and career data sources into consistent student profiles.
- Developed explainable success scoring and academic/placement risk indicators that highlight contributing factors, account for missing data, and help mentors identify students requiring early intervention.

TECHNICAL SKILLS

Languages- C++ | Python | SQL
Backend & APIs- FastAPI | REST APIs | OData | WebSockets
Databases- PostgreSQL | Neo4j | Qdrant
AI/ML- LLMs | RAG | GenAI | AI Agents | LangChain | LangGraph
Core CS- Data Structures & Algorithms | OOP | DBMS
Tools & Practices- Git | GitHub | Azure DevOps | PyTest | Agile

EDUCATION

Pune Institute of Computer Technology **Pune, India**
B.E. Electronics & Telecommunication *Aug 2023 – May 2027* *CGPA: 9.58*

St. Xavier's School and Jr. College **Pune, India**
HSC *Jun 2021 – Mar 2023* *85.67%*

Samarth Ramdas Vidyalaya **Pune, India**
SSC *Jun 2011 – Mar 2021* *89.80%*

ACHIEVEMENTS

HacXLerate Hackathon (AI/Tech Competition) — 1st Runner-up **View Certificate**

Odoo Hackathon — Finalist **View Certificate**

Ignisia AI Hackathon — Finalist **View Certificate**

CERTIFICATIONS

Machine Learning Course (2024) **View Certificate**

Python: From Scratch to Advanced (95%) **View Certificate**
